# FOODHUB

By
1901205-Swaraj Parth
1901199-Soppa Prasunna
1901149-Priyanshi
1901195-Shyam Marjit

# INTRODUCTION

This project creates a food delivery app where Users can order food from their favourite Food stalls, instead of waiting in long queues, just on one click online!!

It has various features like viewing all the restaurants and their available menu options, adding dishes to cart, viewing current orders, viewing order history, making payments online.

Foodhub also allows the Restaurant owners to add menu, update menu details along with its availability, view order history, view current orders.

# Contribution

## Swaraj Parth (1901205)

- Backend(Database,Connecting the components, password encryption, otp mailer in forgot password)
- SRS Document,Data Flow Diagram, Use Case Diagram
- Testing Report

---

## Shyam Marjit (1901195)

- Worked on the frontend pages.
- Backend for menu and cart pages
- SRS Document, Data Flow Diagram, Use Case Diagram
- Worked on the storing of details in database (Login page, Registration page).

## Soppa Parsunna (1901199)

- Created the basic structure of the website.
- Frontend of the project.
- SRS Document,Data Flow Diagram
- Testing, Testing Report

---

## Priyanshi (1901149)

- Frontend Payment Page
- Backend Payment Gateway
- SRS Document,Data Flow Diagram,Use Case Diagram
- Presentation

# Functional Requirements

## USER

- Registration
- Login/SignUp
- Update Personal Details
- View Food Menu
- Add To Cart
- Place Order
- View Previous Order
- Payment:
  i) Cash On Delivery, ii) RazorPay Payment Gateway
